

SPAY SURGERY SAVES LIVES!

Thanks to generous supporters like you, we saved sweet Honey Brown's life a few months ago!

She had a pyometra infection, an infection of the uterus that can be fatal if the female pet is not spayed right away to remove the infected uterus.

She is doing great after her surgery and got all dressed up in a pretty dress to come see us recently at our vaccine clinic to get her vaccine.

We hope you feel as good as we do about helping save the lives of beloved pets with spay surgery!! Her owner is thrilled to have Honey's love and companionship for much longer now!

Surgery Report

September 2023

Dogs

Male neuter - 134

Female spay - 157

Cats

Male neuter - 304

Female spay - 360

Total - 955

DAILY WALKS ARE GOOD FOR YOU AND YOUR DOG!

Taking your dog on a walk every day isn't just important for them to go to the bathroom, it also has numerous health benefits for your dog and you! Walking can lower blood pressure, decrease stress, and help you both to have stronger muscles and bones. It also gives you a chance to spend some quality time with your pup—that is great for both of you!

Best Walking Practices

Walking a few times a week has many health benefits including improved fitness, lower blood pressure, stronger muscles and bones and decreased stress. Walks are also great for our canine pals. Here are tips from our experts on best practices when walking your pup!

Aim for 30-60 minutes a day based on your pet's health and age

Avoid letting your pets ingest anything on your walk

Watch out for signs of heat stroke: **excessive panting, difficulty breathing, drooling, weakness or collapse**

Clean up after your pet

Don't let your pet linger on hot asphalt

Stay hydrated

Always use and leash and collar and have proper identification on your pet, including a microchip

Avoid walking on extreme weather days

Avoid road salt on snowy days
